Homework Checks

Each of you will keep your fully completed homework assignments in a notebook that is well-organized. Make sure that you organize your notebook in such a way that you can quickly and easily find your worked out solution for each problem given only the section, page, and problem number. During a homework check, you will be given a **Homework Check Sheet**. The homework check sheet will have a few problems listed on it identified only by section, page, and problem number. You will not be given the actual problem. You will not be allowed to use the textbook or calculators. You may only use your homework notebook. You will be given a short time to copy your work from your notebook to the homework check sheet. Note: The time will likely be much too short to work out the problems from scratch.

Additional Information:

- The first homework check will be on Monday, February 9. All other homework checks will be unannounced.
- Homework checks will not fall on a quiz day, an exam day, the day before an exam, or the day after an exam.
- Homework checks will not cover the homework that was assigned in the class period immediately before the homework check. That is, if the homework check happens to be on a Wednesday, it will not cover the homework assigned during Tuesday's class.
- You must show supporting work to receive any credit on a problem. Simply writing the answer will likely earn you 0 points.

Sample Homework Check

Textbooks and calculators are not allowed. From your homework notebook, find each of the following problems. Copy your work from that problem including all steps and solutions.

1. Section 3.2, p. 200 #5

2. Section 3.2, p. 200 #39

3. Section 3.4, p. 210 #16
