**CALL FOR FACULTY-STUDENT SHOWCASE
GRANT APPLICATIONS**

2010-2011 Academic Year

The **Faculty Development Committee**, in conjunction with the **Center for Scholarship and Teaching**, announces its continued support of the **Faculty-Student Showcase Grant** program. This program is designed to support collaborative research or creative work between individual students and a faculty member that will result in a presentation at the **Ninth Annual Research and Performance Showcase** on May 5, 2011. Up to five grants of \$500 each will be awarded.

All faculty members (full-time and part-time) are eligible to apply. Students may be undergraduates or graduate students and must currently be enrolled in the College. Examples of eligible expenses include: supplies, photocopying, chemicals, software, travel expenses, and conference registration fees. The grants may **not** be used for personal supplies, journal subscriptions, books, or monetary compensation.

Students are expected to present the results of their work at the **Ninth Annual EC Research and Performance Showcase** on Thursday, May 5, 2011 <<http://elmhurst.edu/~ksagarin/ecrps/>>.

Applications will be reviewed by the Faculty Development Committee and applicants will be contacted with funding decisions on a rolling basis as long as funds are available.

There is no formal application form. An e-mail application (not to exceed the equivalent of two typed pages) should address the following items:

- * Names of the faculty member and student, departmental affiliations
- * Short description of the project
- * Proposed title for presentation at the Research and Performance Showcase
- * Itemized budget
- * A brief discussion of how this project will enhance your academic/professional goals and the student's educational/professional goals.

Applications should be submitted by e-mail to the Director of the Center for Scholarship and Teaching, Earl Swallow (earls@elmhurst.edu, x3577).

Applications will be judged on quality of the proposed activity. Activities that most directly impact faculty scholarship or creative achievement and that demonstrate a strong mentoring opportunity will be given preference for support.
