

Master of PROJECT MANAGEMENT (MPM)

DELIVER SUCCESS FOR ANY ORGANIZATION

Every organization needs reliable managers who can take responsibility for a project's success: coordinating the planning, the people, the process and the product—often from inception to completion. That's why at Elmhurst we help you develop a set of core competencies, so you can deliver projects on time, on budget and to specification—in a wide range of fields and occupations.

YOUR FUTURE IS WELL WITHIN YOUR REACH

With a Master of Project Management degree you'll learn to reach across disciplines and functions, speaking everyone's language to coordinate the team. We'll teach you the tools and techniques you need to oversee a project: budgeting and monitoring, communications and team building, risk management and decision making. You'll also take management electives to broaden your knowledge base and give you a deeper understanding of how to manage people, as well as the work itself.

A NETWORK FOR THE REST OF YOUR PROFESSIONAL LIFE

Many of your classmates are business professionals who currently hold project management positions. So you gain more than a skillset at Elmhurst. You gain a network of teachers and fellow graduates who will support you throughout your career, and connect you with employers all over the Chicagoland area. You'll hit the ground running—tested, proven and ready.

FLEXIBLE, TO FIT YOUR LIFE

Our **EU Flex format** simultaneously integrates both on-campus and online instruction, so you can participate wherever you are.

PMP® READY

Elmhurst's project management program satisfies the Project Management Institute's (PMI) educational requirement necessary to be eligible to take the PMP® exam.

2.2 million

new project-orientated roles
to be filled through 2027

*(project management job growth
and talent gap 2017-2027, PMI)*

\$75K - 160K

project manager's annual
salary, depending on industry

- A bachelor's degree from a regionally accredited U.S. institution or foreign equivalent

Graduate Certificate in Project Management

If you are new to the field, or not sure about pursuing a master's degree, then consider a Graduate Certificate in Project Management. Master the tools and techniques necessary to manage timelines, stakeholders and budgets to successfully achieve project objectives with four project management courses. Should you decide to continue and complete a master's degree, all four courses count toward your degree program.
